1 INFORMATION MEMORANDUM

Nannup Truffle Growers Co-operative Limited (Nannup Truffles or the Co-operative), ABN 79 315 285 843, was registered as a Distributing Co-operative by the Government of Western Australia, Department of Commerce on 19th May 2016.

The Co-operative has issued a Disclosure Statement under the Co-operatives Act 2009 (WA) for an offer of Shares in Western Australia, with the specific purpose of development of a Truffière in the South West of Western Australia, which is appended to this Information Memorandum.

This Information Memorandum is issued in support of the Disclosure Statement, however is not a Product Disclosure Statement or Prospectus and should not be read and construed as a Disclosure document under the Corporations Act.

This Information Memorandum relates solely to the offer of Shares in the Co-operative. It is provided to persons/entities who meet the requisite requirements for membership of Nannup Truffle Growers Co-operative Limited under the Disclosure Statement for a distributing Co-operative registered under the Co-operatives Act 2009 (WA), and lodged with the Government of Western Australia Department of Commerce on 23 April 2021.

The Co-operative makes no representation or warranty (express or implied) as to the accuracy, reliability or completeness of the information contained in this Information Memorandum. The Co-operative and its respective directors, employees, agents and consultants shall have no liability (including liability to any person by reason of negligence or negligent misstatement) for any statements, opinions, information or matters (express or implied) arising out of, contained in or derived from, or for any omissions from the Information Memorandum, except liability under statute that cannot be excluded.

The Information Memorandum contains reference to certain intentions, expectations and plans of the Co-operative. Those intentions, expectations and plans may or may not be achieved. They are based on certain assumptions that may not be met or on which views may differ. The performance and operations of the Co-operative may be influenced by a number of factors, many of which are outside the control of the Co-operative.

The Information Memorandum does not purport to cover all relevant information about any potential investment in the Co-operative or its underlying business.

It is not intended to be a complete or accurate statement of material information. Except where stated, the information disclosed relates to the proposed business of the Co-operative at the date of this Information Memorandum. No responsibility is accepted to advise of any change. The Co-operative reserves the right to reject any expression of interest and to withdraw this Information Memorandum at any time without giving notice.

Recipients must make their own independent assessment of the offer and should not rely on any statement contained in this Information Memorandum as to the significance, adequacy or accuracy of any matter described in this document.

An investment in the Co-operative should be considered speculative because of the nature of the Co-operative's business. This section identifies the major areas of risk associated with an investment in the Co-operative, but should not be taken as an exhaustive list of the risk factors to which the Co-operative and its Shareholders are exposed.

Agriculture: Any investment in agriculture carries inherent risks in primary production due to matters beyond the control of the Co-operative.

Hail, Storm and Fire: Risks from hail, storm and fire can arise in agricultural pursuits. The Truffière is insured against hail and fire, and storm damage may damage the trees but is unlikely to destroy them.

Truffle Yields: Truffle production can be unreliable and spasmodic, however recent improvements in management techniques have improved Truffle production, particularly in Western Australia.

Truffle Prices: The price of Truffles is subject to market forces and may not be achieved for the life of the project.

Economic Risks: A more comprehensive statement of risks are incorporated at Clause 9.

Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of the Co-operative and cannot be mitigated. Accordingly, an investment in the Co-operative carries no guarantee with respect to the payment of dividends or return of capital.

Investors should be aware that there is a risk that Truffles will not be produced in the quantities or timeframe as estimated in this Information Memorandum. Accordingly, Investors should be aware that an investment in Nannup Truffles is considered a speculative investment.

Potential Investors should read the entire Information Memorandum and Disclosure Statement and consult their professional advisers before deciding whether to apply for Shares.

Applications for the Shares may be made on the Application Form contained within this Disclosure Document or on the Application Form on the website at nannuptruffles.com.au.

2 EXECUTIVE SUMMARY

NANNUP TRUFFLE GROWERS CO-OPERATIVE LIMITED

- This Information Memorandum and Disclosure Statement offers an investment opportunity to participate in a Co-operative which has established a Truffière in Nannup in the South West of Western Australia.
- Nannup Truffle Farm Pty Ltd (Landholder) has a Share Farming Agreement with the Co-operative and has developed the Truffière of tree orchards providing a balance of Deciduous Oaks and Evergreen Oaks and seeking to produce French Black Truffles (*Tuber melanosporum*).
- Western Australia is becoming a substantial producer of “French Black Truffles”, with increasing development and production over the last 13 years.
- “French Black Truffles” are a highly prized and highly priced food! Held in highest esteem in European cooking since the 1700's, Truffles and Truffle products are being widely sought after across all Western countries, and now recently in Asia. Black Truffles may fetch a wholesale price of up to **\$1,000** per kg in season, and retail at prices up to \$3,000 per kg.
- 5,600 trees were inoculated with Black Truffle spores and planted on the Farm in November 2017.
- Under the terms of the Share Farming Agreement, the Landholder has established the Truffière and maintained the Truffière for 3 years. The risk of damage or death of the planted trees was with the Landholder until the sale of the trees to the Co-operative in 2021.
- The Co-operative has acquired the going concern of Nannup Truffles, and currently owns 50% of trees in the Truffière. The balance of the Truffière is under an Option Agreement by the Co-operative to acquire the trees as share subscriptions allow - at incurred costs to the date of acquisition.
- Dr Nick Malajczuk is overseeing management of the Truffière for the Co-op. Dr Nick has over 25 years of experience in forestry and was the founder of the Australian Truffle industry in the early 1990's.
- A Share in the Co-operative will cost \$1,750 per share.
- A Share in the Co-operative provides an interest which is equivalent to ownership of 6 oak trees in the Truffière.
- Truffières generally take approximately 6 years to reach full production stage - with some varieties earlier and some later, and is highly dependent upon the local conditions. The South West of WA has had excellent results in production and early production with some Truffières achieving extraordinarily high and early yields.
- The Australian Truffle Growers Association reports “Growers have been consistently getting Truffles after 4 to 5 years with the new technology being employed”.
- The Nannup Truffle Growers Co-operative produced its first Truffle in July 2020 - 2 years and 8 months after planting.
- By August 2021, after 3 years and 9 months, the Truffière has produced over 30 Truffles - weighing over 3 kgs.

2 EXECUTIVE SUMMARY

- Some Truffières in Australia have had poor production yields but WA has had very high yields, some purportedly as high as 1kg per tree or 400kg per hectare. European and US reports suggest 100kg to 120kg per hectare is achievable.
- The Co-operative has forecast yields from maturity of approximately 220g per tree or 100kg per hectare. Based upon these yields, forecast returns to Co-operative members could **exceed 20%** per annum after tax. (Although there is no guarantee of these yields).
- The conservative forecast yields can be demonstrated as follows:
- Forecast Returns to Investors (but not guaranteed).

<u>PRODUCTION YIELDS AT FULL PRODUCTION</u>		
	Yield Per Hectare	Yield Per Tree
Purported Yields - WA	400kg	1kg
Reported Yields - WA	100-200kg	220-330g
Reported Yields - USA	100kg	220g
Reported Yields - EU	150kg	330g
Adopted Base Case - NTC	100kg	220g
High Yield Case - NTC	150kg	330g

<u>BASE CASE YIELD</u>							
YEAR	2022	2023	2024	2025	2026	2027	
Yield Per Tree	0g	0g	0.045g	0.11g	0.22g	0.22g	
Return to Investors - Dividend Per Annum (Fully Franked)	<u>0</u>	<u>0</u>	<u>0</u>	<u>3%</u>	<u>8%</u>	<u>14%</u>	

MEMBERSHIP BENEFITS

- Membership benefits include:
 - An invitation to Truffle Degustation Dinners, and seasonal Truffle functions.
 - Invitations to join future Annual Truffle Hunts.
 - The right to keep your produced Truffles or sell them at Farm Gate Prices.

3 THE OFFER

SECURITIES TO BE ISSUED

Shares in Nannup Truffle Growers Co-operative Limited.

Each Share is issued on the following terms:

Payable on Application	<u>\$1,750</u>
Being: Nominal Share Value	\$50
Premium per Share	<u>\$1,700</u>
	<u>\$1,750</u>

ISSUER

Nannup Truffle Growers Co-operative Limited (the Co-operative).

INVESTMENT TERM

The term of the Co-operative will be 20 years from the date of planting and then will subsequently be wound up. In the event economic returns are not received within 10 years of the date of planting, the Co-operative will be wound up.

SHARE ISSUE PRICE

Payable on application \$1,750 (One Thousand Seven Hundred and Fifty Dollars per Share).

MINIMUM APPLICATION AMOUNT

1 Share.

TARGET SUBSCRIPTION

The Co-operative has received applications and issued 459 shares. The target subscription is 1,000 shares.

MINIMUM SUBSCRIPTION

There is no Minimum Subscription.

APPLICABLE FEES

There are no entry, exit, rollover or management fees.

4 BUSINESS STRUCTURE

Nannup Truffle Growers Co-operative Limited has been established for the specific purpose of establishing a Truffière in Nannup in the South West of Western Australia.

STRUCTURE

A Co-operative was chosen as an appropriate structure to implement the establishment of the Truffière as it provides for each member to participate equally in the operations and voting rights, and eliminates the possibility of a corporate take over of the Co-operative or parties seeking to direct the intentions and activities of the Co-operative from its agreed purpose and objectives.

MEMBERS

Members of the Co-operative are encouraged to participate in the activities of the Co-operative now and in the future.

All members are invited to attend Truffle Dinners which are conducted throughout the Truffle season.

Once the establishment of the Truffière is complete, members will be invited to join the Annual Truffle Hunt and the Landholder's intent is to establish chalets or eco-chalets on the property available as accommodation to members.

OBJECTIVE

The objective of the Co-operative is to establish a Truffière of Deciduous and Evergreen Oaks which have been inoculated with the spores of Truffles. The intent of the Co-operative is to produce Black Truffles.

CONTRACTUAL ARRANGEMENTS

The Board of Nannup Truffle Growers Co-operative Limited has established the following contracts.

SHARE FARMING AGREEMENT

A Share Farming Agreement has been agreed between the Co-operative and the Landholder. Under this Agreement the Landholder provides the following services:

- Land, cleared and prepared for planting.
- Trees, inoculated and planted.
- Water.
- Farm Insurance.

Under the Share Farming Agreement, the Landholder will prepare and plant the Truffière, and manage the Truffière for the first three years. The Co-operative has agreed to acquire the established trees upon conclusion of the first three years. The Co-operative will provide deposits on trees in proportion to subscriptions received.

From Years 3 to 5 of the establishment years, services will be provided on a reimbursed cost basis, which from Year 6 converts to a 25% share in the Net Farm Profit. The Landholder will also provide corporate services (executive services) as required.

MANAGEMENT AGREEMENTS

Management Agreements have been agreed between the Co-operative and the Managers. Under these agreements, the Managers provide the following various services:

Truffière Consultant:

- Tree inoculation.
- Project oversight.
- Mycology

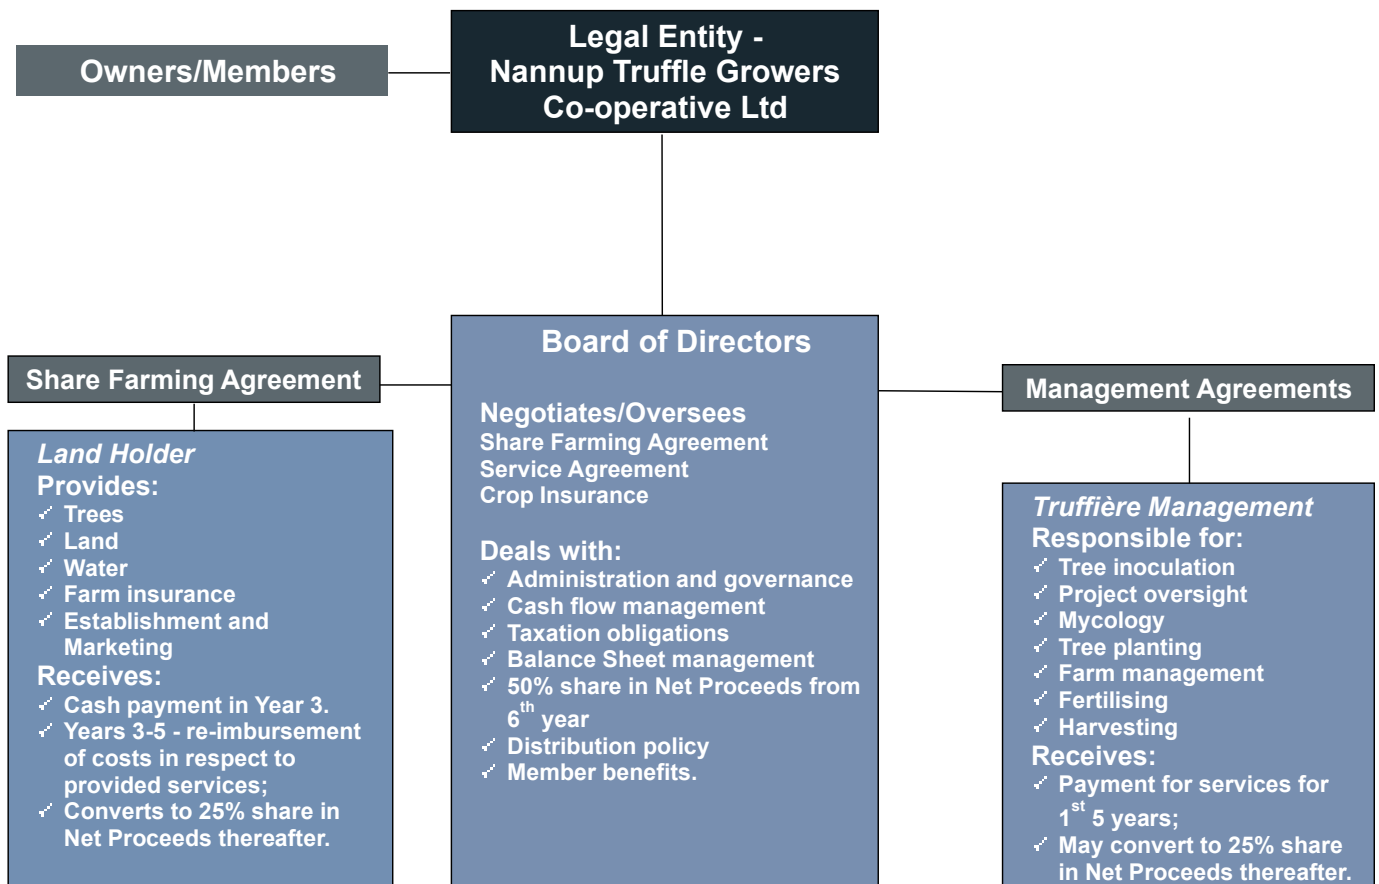

Truffière Operational Management

- Tree planting.
- Farm management.
- Fertilising.
- Harvesting.

The Managers will receive payments for services for the first 5 years, being the establishment phase, which then may continue on a service basis or convert to a 25% share of the Net Farm Profit.

4 BUSINESS STRUCTURE

5 DETAILS OF THE OFFER

5.1 THE LAND

The South-West region of Western Australia has demonstrated extraordinary results in cultivating “French Black Truffles”.

A number of Truffle producers have been established in the immediate surrounding localities of Manjimup, Pemberton and Donnybrook.

The site - Lot 12 Hartnett Road, Brazier - is located in between the existing producing localities.

The site is extremely well suited to growing Truffles - with perfect climatic conditions (frosts in Winter) and topographically (well drained soil on hilly banks).

The site is an existing farm which has been cleared and 5,600 English and French Oak trees inoculated with Black Truffle spores have been planted. The plantings are fully reticulated with water supplied from a 160,000 cubic litre dam covering over 10 acres on the property.

Located approximately 280 kilometres from Perth, Brazier is a rural community located closely to the tourism towns of Nannup and Balingup.

Extensive soil reports have been undertaken including Electromagnetic Induction and Ground Penetrating Radar and has determined high quality suitable soils over 100 acres.

5 DETAILS OF THE OFFER

5.2 THE TREES

Nannup Truffle Growers Co-operative Limited has established the Truffière on the property comprising 5,600 trees providing a balance of Deciduous Oaks and Evergreen Oaks and seeking to produce Black Truffles (*Tuber melanosporum*).

PLANTINGS

- Under the Share Farming Agreement, the Landholder has planted 5,600 dual inoculated trees on the farm in November 2017, making the Truffière one of the largest in Australia. The planting of the trees required 30km of reticulation piping, 5,600 weed mats, tree guards and sprinklers.

YIELDS

- Yields from Truffières around the world vary considerably from no production to extremely high yields, particularly in the South-West of WA, with some purportedly as high as 1kg per tree.
- A Thesis submitted by H.E. Alvis to Oregon State University claims yields of 100kg per hectare in Oregon, USA. Truffle Trees in France maintain Truffle plantations and project 120kg per hectare in Year 6, Garland Truffles in North Carolina 125kg per hectare, and New World Truffles 88-250kg per hectare. In WA, Five Acre Nursery forecasts 100kg to 200kg per hectare by Year 10 of production.
- Whilst there is no guarantee of production, the Co-operative has forecast modest yields from maturity of 220g per tree on Black Truffles, averaging 100kg per hectare.

Planting November 2017

5.3 TRUFFIERE MANAGEMENT

It is essential that management of the Truffière is meticulous. Nannup Truffle Growers Co-operative Limited has brought together a team of experienced people to ensure that this management is performed at optimum levels.

The project is under the direction of Dr Nick Malajczuk, Director of Treetec Consulting Pty Ltd - the founder of the Truffle industry in Australia.

Dr Nick Malajczuk has worked with many Truffle farms for the cultivation of Truffles throughout Western Australia and internationally.

Dr Nick, a former microbiologist and CSIRO researcher, is able to utilise his scientific research and Truffle cultivation expertise to manage the requirements of the farm.

For operational management the Co-operative has engaged the expertise of Ross Varnavides of WA AG Solutions. Ross hails from an agricultural background and has a natural instinct for all things agricultural and is responsible for maintaining the farm and health of the trees. Routine inspection of the trees, soil and pH levels are maintained to keep the trees at optimum health.

Together, this working relationship ensures every aspect of the farm management is covered for maximum benefit to the Co-operative.

Tree growth Feb 2019

6 ABOUT TRUFFLES

WHAT ARE TRUFFLES?

The Truffle is an edible fungus that grows underground through a symbiotic relationship with the roots of specific host trees. When the tree and the fungal filaments reach maturity, usually after about five years, the fruiting body or Truffle is produced and occurs seasonally thereafter.

Truffles can be described as 'gourmet mushrooms'. They have a pungent, intense, earthy fragrance and lend a unique flavour and aroma to food. The Truffle is used in extremely small quantities and yet its flavour and aroma turn a standard offering of soup, chicken, meat or game into a gourmet experience.

WHERE DO THEY OCCUR?

Truffles occur naturally in the northern hemisphere where there are over 70 species that have been taxonomically described. The Black Truffle or Tuber Melanosporum, also known as the Perigord Truffle, grows mainly in France and Italy and is the variety most commonly cultivated in a Truffle orchard or Truffière. With a unique scent, they are sniffed out by trained pigs and dogs.

Truffles in Europe occur under their native woodland trees of oak, poplar, willow and hazelnut. In the regions of France and Italy where Truffles occur naturally the Truffle harvests are decreasing over time. It is thought that this is due to urbanisation, climate change and pollution. For example, prior to 1914 some 1800 tonnes of Truffles were harvested annually in the Perigord area alone. Now the whole of France produces less than 50 tonnes. In 1998 annual production was reported to be only 8 tonnes.

In the 1970's a major initiative began in France to cultivate Truffles. There are now also established Truffières in Spain and Italy. However productivity from these orchards is relatively small compared to that collected in the natural forests.

Outside of Europe, the first Black Truffles were produced in 1991 on specially inoculated oak trees in Oregon, USA. There have now been substantial plantings in the USA including a 70-hectare Truffière established near Houston Texas in 1991.

In the southern hemisphere, the winter of 1993 saw the first production of commercial Truffles in New Zealand, and in 1999 Black Truffles were produced in Tasmania to further confirm their production feasibility in the southern hemisphere.

The first Truffles produced in the Manjimup region occurred in August 2003.

The Black Truffle is not sought after because of its appearance! While it is generally round in shape, it can have many differently shaped "knobs" and "crevices". The size can range from that of a marble, to almost the size of a soccer ball. The most desired Truffles are those that range from a golf ball to tennis ball size. This would translate to between 25 and 200 grams weight. "Icon" sized Truffles (more than 500 grams) are highly sought after and premium prices are paid for top quality specimens.

The ripe Truffle, when cut, exhibits a dense black interior that is streaked with white veins. The Truffle is firm and resembles the texture of a potato. The outside has a fairly tough, scaly skin that can withstand the conditions in which the Truffle grows.

6 ABOUT TRUFFLES

ABOUT BLACK TRUFFLES

WHAT DOES A BLACK TRUFFLE SMELL OR TASTE LIKE?

It is not easy to describe the flavour and aroma of the Black Truffle. It is appealing and earthy.

Some descriptions of the flavour and smell are: -

- The floor of the forest.
- Scallops and seafood.
- A mixture of chocolate and earth.
- Old over-used socks!
- A rugby locker room after a match!

Some adjectives are: -

- Erotic
- Earthy
- Exquisite
- Smouldering
- Sexy

In the end, you must find a quality restaurant and chef and try these for yourself.

CULTIVATING TRUFFLES: HOW DO THEY GROW?

The fungus attaches to the fine roots of oak and hazelnut trees and has a very fine root structure of its own called "mycelium". The fungus and the tree live in what is called a "symbiotic relationship" where they assist each other to survive and prosper.

The tree will provide necessary carbohydrate (sugars) for the fungus while the fungus will give back essential micro nutrients, which it extracts from the soil that the tree cannot access.

The Truffle is the fruit body of the fungus. The Truffle is "seeded" in spring and will increase in size through summer and autumn and then ripen when the chill of winter sets in.

HARVESTING TRUFFLES:

Truffles ripen and are harvested during the winter months. In the southern hemisphere, this is during the months of June, July and August.

Finding the ripe Truffle is a specialist job that has evolved from pigs that would root them out to eat, to highly trained dogs. The dogs locate the subterranean prize with their heightened sense of smell, mark the spot with a scratch of their paw, and then sit to receive their reward. It is an amazing experience to see the dogs pick up the scent of a ripe Truffle some 30 metres away, and then focus in on the prize find.

Once a Truffle is located, the spot is marked and the hunt continues. After about an hour, the dog becomes tired and is rested while the dog handler retraces the hunt path and excavates the located Truffles.

The Truffles are then washed, sorted, and graded. Grading will account for factors such as smell, size, shape, and feel of the Truffle. During the grading process, the Truffle will be "nicked" or a small amount removed to allow the interior to be observed for colour. This also allows the buyer to see the Truffle.

Once sorted and cleaned, the Truffles are then packed to order and prepared for shipment in specially designed and insulated containers with refrigerated cooling blocks.

6 ABOUT TRUFFLES

PACKING AND TRANSPORT:

At harvest, the Truffles are graded into three classes according to European standards, Extra class (premium), 1st and 2nd Class. Once harvested the Truffles are carefully cleaned, washed and sealed with an Argon/Nitrogen gas mix. This gas mix reduces oxidation and breakdown of the Truffle, packed with ice packs and shipped in iceboxes directly anywhere in the world.

The packed Truffles, should reach any airport around the world within 36 hours of leaving the farm gate, ensuring the Truffles are the freshest possible upon arrival.

STORING FRESH TRUFFLES:

Enjoying Truffles within 5-7 days of unearthing them is the very best way to experience Truffles.

To help keep them longer, they can be gently wrapped in absorbent paper and stored in a dry, airtight glass or plastic container in the crisper compartment (not the cold part) of the refrigerator.

The absorbent paper should be changed daily and the container must be kept dry. Bear in mind that the strong aroma of Truffles will impregnate other foods, this can be advantageous, but to avoid this ensure that the Truffles are stored in their own container. In cooler months the Truffle can be stored out of the refrigerator in its container out of sunlight. The ideal temperature for storing Truffles is between 4 and 8 °C.

Our Truffles

7 THE PEOPLE

The project brings together a team of experienced and proven experts in the fields of Business, Research and Truffiere Establishment in the Truffle Industry.

David Somerville - Director

David is an Accountant by background, with over 30 years experience in business development. David is currently Executive Chairman of the ASX Listed Questus Limited, a Funds Manager and Property Asset Manager and Developer. David is also Chairman of the ASX Listed CI Resources Ltd, a phosphate mining company located on Christmas Island with plantation investments in Malaysia.

Graeme Goff - Director

Graeme is a qualified accountant with over 30 years experience in Public Practice and Commerce with a strong focus on compliance, management systems, year end financial reporting and taxation. During this period Graeme provided professional services to a number of primary producers across a broad range of farming sectors.

He commenced his professional career in 1986 with PriceWaterhouseCoopers where he rose to the position of Director. Graeme has worked in a variety of roles as a Chief Financial Officer, Company Secretary and Director.

Adrian Gurgone - Director

Adrian is an experienced MBA Chartered Accountant with significant experience in advertising organisations across a variety of industries globally. His expertise encompasses financial, economic and business analysis, risk management and corporate governance. Adrian has also assisted several boards both in Australia and overseas in improving organisational performance and in capital allocation decision-making.

Dr Nick Malajczuk - Treetec Consulting Pty Ltd - Farm Management

Dr Nick is the Managing Director of Treetec Consulting, the founder of the Truffle Industry in Australia. With over 25 years research experience as a scientist with CSIRO, Treetec Consulting Pty Ltd has initiated the growing of Truffles in Western Australia and Tasmania, the production of inoculum of mycorrhizal fungi for forest nurseries and promoted the growing of irrigated Paulownia trees on farm lands in Australia.

Dr Malajczuk has combined production with ongoing research, encouraging and funding positions within Universities and acted as a consultant to private investment companies in Australia growing eucalyptus, teak, brushwood and sandalwood. Dr Malajczuk also has extensive forestry experience in China, the Philippines and Japan, and is a primary consultant to the Truffle industry in Australia and the USA.

Ross Varnavides - WA AG Solutions Pty Ltd - Truffiere Establishment

Ross is highly experienced in Truffiere establishment, having a predominantly agricultural background and an understanding of the 'hands on' nature of the establishment and maintenance of the Truffiere.

Ross has been an integral part in the establishment phase of the Truffiere and his farm know how has worked seamlessly with the multi-faceted team.

8 FINANCIAL PROJECTIONS

Nannup Truffle Growers Co-operative Limited is a Co-operative incorporated on 19th May 2016 with the specific purpose of development of a Truffière in the South West of Western Australia. The Co-operative has planted 5,600 trees inoculated for the production of Black Truffles.

PRO FORMA - BALANCE SHEET

The Co-operative was incorporated in 2016, with planting completed in 2017 by the Land Provider by virtue of the Share Farming Agreement between the Land Provider and the Co-Operative. The Co-operative is to acquire the inoculated trees from the Land Provider after an established period of 3 years. In October 2020, the Co-operative acquired 50% of the available trees.

As at the date of this Information Memorandum the Co-operative has issued 459 shares for \$661,250.

The pro-forma Balance Sheet below shows the forecasted financial position of the Co-operative after the completion of the following events.

- The issue of an additional 485 Co-operative Shares paid to \$1,750 each issued under this Information Memorandum.
- The progressive purchase of the remaining 2,800 inoculated trees.
- Farm operating income and expenses as budgeted.

8 FINANCIAL PROJECTIONS

NOTES TO PROJECTIONS

The financial projections have been prepared on the basis that \$1.0 million is successfully raised under an Information Memorandum. The forecast period represents the 5 year period from November 2017 for the establishment of the Truffière, with only minimal income being received from the farming and sale of the Truffles. The maturation of the Truffle production is expected to substantially increase in Year 6 and gradually grow to maximum yields by Year 10.

All applicable revenue and costs are stated net of GST.

1. Sale price of Truffles - “at Farm Gate”

- Black Truffles - \$900 per kg

This is based upon current Truffle prices being received by producers at wholesale or “Farm Gate Prices” in 2020.

2. Peak Production

	Hectares	Yields (kg per Ha)	Yield Per Tree	Full Production
Black Truffles	12	102.66	0.22kg	1232kg

9 RISK FACTORS

Investors are encouraged to obtain independent legal, accounting and/or financial planning advice in relation to this Offer.

Set out below is a summary of some of the risk factors associated with this type of investment.

Please note that there may be other risk factors in addition to the ones set out below, however, the Co-operative believes these to be the major risk factors:

Economic Factors

The performance of the investment could be affected by domestic and/or international factors. Should either the world or Australian economies experience a downturn, this could in turn impact on distribution sales and other economic factors outside of the Co-operative's control.

The Federal Government's fiscal and monetary policies may also impact on the general economic environment.

Changes in Taxation and Other Laws

The forecast returns to Investors set out in this Information Memorandum are based on the current taxation law. The forecast returns may be affected by future changes to the law.

Liquidity

Unlike other securities such as Shares listed on a stock exchange, the Shares may not be tradeable.

Income Risk

The Co-operative is subject to industry fluctuations, so that demand may vary depending on, but not limited to, exchange rates, global oil prices and other variables outside the control of the Company.

Managerial

The ability of the Co-operative and other relevant parties to meet their obligations.

Material Agreements

Any default by relevant parties to the material agreements may affect completion dates and projected sales revenues.

Agricultural Risks

Any investment in agriculture carries inherent risks in primary production due to matters beyond the control of the Co-operative. The following agricultural risks have been mitigated to the best ability of the Company.

Drought Risks

A dam with a capacity of 160,000 cubic metres already exists on the land, this is more than adequate as a water supply for the Truffière.

Water Availability

The project will be irrigated with water from the established dam which is located on the site and provides water all year round.

Water Salinity

There are no salinity issues which arise from the use of water from the dam.

Flood

Flood is considered a low risk factor for the property. The topographical plan reveals that the property has a significant valley that drains the entire property.

Frost

Frost is not a risk for the project.

Oak trees are native to areas that experience extreme frosts and in fact, are a critical selection criteria being a requirement for frost and extreme cold in the ripening process for Truffles.

Hail, Storm and Fire Risks

Risks from hail, storm and fire are real. Hail can damage the host trees but is unlikely to destroy them.

The Truffière is insured against hail.

Leaf and branch damage is possible, however this type of damage will have a negligible effect on Truffle production.

Storm damage can completely remove trees and therefore is a real risk. The property itself is adjacent to state forests. These trees are very large and will work as a shelter for the trees of the Truffière. These natural wind breaks will assist to reduce the potential for damage.

9 RISK FACTORS

Fire is a real risk to the Truffière. Potential fire damage will be managed by the provision of fire breaks and maintaining the Truffière in a clean and manicured condition. The Truffière will be fully irrigated, and insured.

Pests and Disease Damage

The potential for disease risk to the Oak trees is considered low. There are no known diseases that could cause significant tree fatalities.

Truffle Yields

Truffle production in the natural habitat is notorious for being unreliable and spasmodic.

Investors should be aware there is a risk that Truffles will not be produced in the quantities or timeframe as estimated in this Information Memorandum.

Secondary Market

Whilst Shares are transferable, Shares in the Company are currently, and will remain, illiquid because there is no secondary or public market. Shareholders will generally only be able to dispose of their Shares by means of private arrangement and negotiation.

10 CONDITIONS OF ISSUE

CONDITIONS OF THE ISSUE

The terms and conditions of the Shares issue are as follows:

1. Co-operatives Act

Shares issued in accordance with these conditions are Shares issued under the Co-operatives Act, and as such applicants for the issue of Shares must meet the requisite requirements for membership of the Co-operative and agree to comply with the Registered Rules of Nannup Truffle Growers Co-operative Limited, as described in the attached Disclosure Statement for a proposed distributing Co-operative registered under the Co-operatives Act 2009 (WA).

2. Undertakings

The Co-operative must:

- (a) business: carry on and conduct its business in a proper and efficient manner; and
- (b) insurance:
 - (i) insure and keep insured the parts of its property and assets which are of an insurable nature against damage and destruction; and
 - (ii) take out and keep in force workers' compensation, public risk and business interruption insurance.

3. Transfer

- (a) Every Shareholder is entitled to transfer the Shares or any part of them by an instrument in writing in the usual common form or in such other form as the Co-operative approves.
- (b) The transferor is deemed to remain the owner of such Shares until the name of the transferee is entered in the Register.
- (c) No fee is to be charged on the registration of any transfer of Shares.

GENERAL

1. Notices

Any notice or other communication in connection with these Conditions or the Shares:

- (a) must be in writing addressed to the address specified by the recipient to the sender by notice from time to time and in the case of notice to a Shareholder to that Shareholder's Registered Address;
- (b) must be signed by an officer or under the common seal of the sender;

- (c) is deemed to be given by the sender and received by the addressee:
 - (i) if by post, three days after it is posted; or
 - (ii) if by facsimile transmission or other electronic means, when received by the addressee.

but if delivery or receipt is on a day which is not a Business Day or is after 4.00pm (addressee's time) it is deemed to be duly given on the succeeding Business Day;

- (d) can be relied upon by the addressee and the addressee is not liable to any other person for any consequences of that reliance if the addressee believes it to be genuine, correct and authorised by the sender.

2. Exercise of Rights; Non-Waiver; Cumulative Remedies

- (a) No failure on the part of a Shareholder, no deal in exercising, and no course of dealing with respect to any right, power or privilege hereunder operates as a waiver thereof.
- (b) No single or partial exercise of any right or power hereunder and no waiver of any right, power or privilege hereunder is effective unless made in writing.
- (c) The rights and remedies herein provided are cumulative and not exclusive of any rights or remedies provided by law.

3. Governing Law and Jurisdiction

These Conditions are governed by and construed in accordance with the laws of Western Australia and the applicable laws of the Commonwealth of Australia in force from time to time.

4. Severability of Provisions

Any provision of these Conditions which is prohibited or unenforceable in any jurisdiction is, as to that jurisdiction, ineffective to the extent only of that prohibition or unenforceability without invalidating the remaining provisions of these Conditions or affecting the validity or enforceability of that provision in any other jurisdiction.

10 CONDITIONS OF ISSUE

INTERPRETATIONS

Unless the contrary intention appears in the Conditions:

- (a) words importing the singular include the plural and vice versa;
- (b) words importing a gender include any gender;
- (c) where a word or phrase is given a particular meaning, other parts of speech and grammatical forms of that word or phrase have corresponding meaning.

DEFINITIONS

Application

Means the application for membership of the Co-operative as appended to this Information Memorandum.

Business Day

Means a day on which trading banks are open for business in Perth, Western Australia.

Certificate

Means a certificate in a form approved by the Co-operative from time to time.

Company or Co-operative

Means Nannup Truffle Growers Co-operative Limited.

Conditions

Means the conditions of issue.

Co-operatives Act

Means the Co-operatives Act 2009 (WA).

Corporations Act

Means the Corporations Act 2001 (Cth).

Disclosure Statement

Means the Disclosure Statement appended at Appendix A as approved by the Government of Western Australia, Department of Trade and Commerce on the 19th May, 2016.

Farm Gate Price

Means the wholesale price for the purchase price of Truffles in the South West of WA.

Information Memorandum

Means this document.

Investors

Means the person/entity who has completed the Application Form contained in this Information Memorandum, for membership within the Co-operative.

Issue Price

Means the face value of the Share being \$1,500.

Issue Date

Means the date on which the Company issues the Shares.

Management Agreement

Means an agreement entered into between the Co-operative and the Managers.

Net Farm Profit

Means the profit derived from the activities of the Co-operative before the service fee attributable to the Truffière Manager and the Share Farming arrangement.

Register

Means the register of Shareholders kept by the Company in accordance with section 230 of the Co-operatives Act.

Registered Address

Means the address of the Shareholder recorded in the Register.

Share

Means a Share having a face value of \$1,500 and issued in accordance with these Conditions.

Share Farmer

Means Nannup Truffle Farm Pty.

Share Farming Agreement

Means an agreement entered in to between the Co-operative and the Share Farmer.

Shareholder

Means a person/entity who is the holder of Shares.

Truffière Management

Means Dr Nick Malajczuk.

- ANNEXURE A: OPERATING STRUCTURE

DATE OF LODGEMENT WITH REGISTRAR: 1 July 2022

1

11 APPENDIX A - DISCLOSURE STATEMENT

DISCLOSURE STATEMENT

1 EXPLANATION OF THIS STATEMENT

This is a Disclosure Statement lodged in accordance with the *Co-operatives Act 2009 (WA)* (the Act) Section 137A requirement that a registered Co-operative maintain a current disclosure statement.

2 ACTIVE MEMBERSHIP PROVISIONS

- 2.1 The Nannup Truffle Growers Co-operative Ltd (the Co-operative) active membership rule identifies the Co-operative's basic reason for existence as being:
- (a) establishing and managing a *truffière*; and
 - (b) facilitating member activities associated with the production and harvesting of truffles, and to maintain their membership of the Co-operative, a member shall:
 - (a) meet their financial obligations under the rules; and
 - (b) attend, or be represented at, at least one meeting convened by the board in any triennium; and
 - (c) maintain a current distribution declaration at all times.
- 2.2 A co-operative may also have objects in addition to primary activities. The objects of the Co-operative are to:
- (a) be an agricultural production entity that provides a cost effective Share-Farming arrangement for individuals interested in the production and harvesting of truffles;
 - (b) provide Members with an option to receive distributions in-specie or from the proceeds of sale of truffles to an approved truffle product producer; and
 - (c) provide ancillary Member benefits relating to truffle production and promotion.

The Co-operative intends pursuing its objects in the manner set out in Annexure A: Operating Structure and intending Members should consider the need to carry out due diligence prior to applying for membership as the establishment of a *truffière* is a medium- to longer-term venture. Truffles are a fungus that grows under the ground as a result of a symbiotic relationship with the roots of particular trees, typically not occurring until approximately 6 years after tree planting, as such truffle production volumes and timing is uncertain.

Nannup Truffle Farms Pty Ltd will provide the land and initial planting services under a Share Farming Agreement. The Share Farming Agreement provides for the arrangements between the Nannup Truffle Farm Pty Ltd and Nannup Truffle Growers Co-operative Limited, wherein Nannup Truffle Farm Pty Ltd will establish the *truffière*, and provide farm related services for the initial 6 years, after which the consideration will convert to a 25% share in the net proceeds from harvested truffles..

The proposed total term of the Share Farming Agreement will be for 20 years, however, in the event that commercial yields are not achieved by the truffiere within 10 years, the Share Farming Agreement shall terminate. At the end of the lease all improvements on leased land will vest in the landowner.

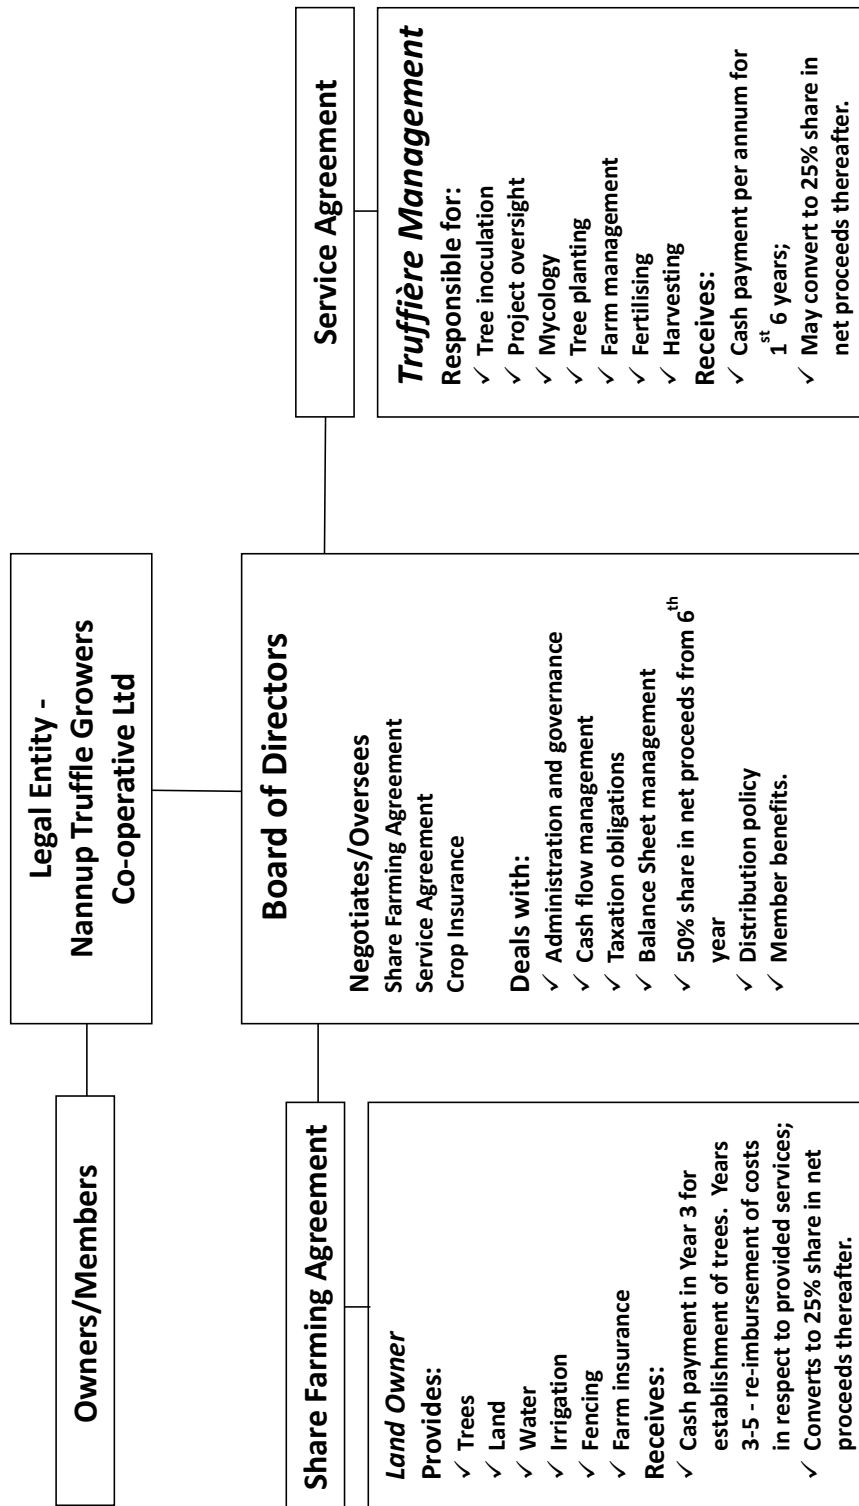

3 RIGHTS AND LIABILITIES ATTACHING TO SHARES

- | | | |
|-----|--|--|
| 3.1 | Share Capital cost per member | \$1,750.00 minimum (1 share @ \$50.00 nominal value plus \$1,700 premium per share payable in full on application) |
| 3.2 | Membership target | 200 members |
| 3.3 | Annual Subscriptions Levies (if any) | \$nil |
| 3.4 | Rights attaching to shares are an entitlement to a share of operating surpluses, if any, as distributed by the board in accordance with the rules, and to the return of paid-up share capital to a maximum of the nominal value per share on exiting the Co-operative. | |

Application and Acknowledgements

I hereby apply for Membership of the Co-operative and acknowledge and warrant that:

1. If accepted as a member of the Co-operative I will be bound by contract to the Co-operative's Rules.
2. I had the right to request to either inspect at the Co-operative's office, or be sent -
 - a) a consolidated copy of the rules of the Co-operatives; and
 - b) a copy of all special resolutions applicable to members and passed at a members meeting since the last AGM of the Co-operative, except special resolutions providing for an alteration to the rules of the Co-operative; and
 - c) a copy of the most recent financial information reported to Members under the Co-operatives Act 2009 (WA) as amended.
3. I meet the prerequisite requirements for membership of the Co-operative.
4. I am required to subscribe for at least one ordinary share in the capital of the Co-operative.
5. Subscription fee for one ordinary share is \$1,750 comprised of \$50.00 nominal value plus \$1,700.00 share premium.
6. The Co-operative makes no warranty or representation regarding the benefits of membership.
7. This application is based on my own assessment of benefits expected to be derive from Co-operative membership.
8. The above email address is provided for the purpose of receiving communication from the Co-operative.
9. If accepted as a Member I will ensure the Co-operative has a current email address for member communications.
10. Co-operative is not required to give any reason should this application be declined.
11. If this application is not accepted for any reason a full refund will be made without interest and without deduction.

I hereby apply for the following shares and attach a **cheque/or receipt from the secured payment facility on the nannuptruffles.com.au website** for the Total Payable on Application i.e. D multiplied by E:

A Nominal Value Per Share	B Premium Per Share	C Total Cost Per Share	D Ordinary Shares Applied For (insert No.)	E Total Payable on Application C multiplied by D
\$50.00	\$1,700.00	\$1,750.00		\$
